

Town of North Beach Water Meter & AMR System Installation
Addendum #1
March 5, 2019

1. What is the breakdown by meter size? 95 percent of the meters are $\frac{3}{4}$ inch with a few that are 1 inch
2. Number of meters –
 - a. In pits? 603
 - b. In vaults (OSHA)?
 - c. In Interiors? 160
3. Is there a location available for a staging, storing new and old meters? Yes, there will be an area at the Public Works Department Yard
4. Is this a phase of ongoing program? No, there is not.
5. We noticed the screenshots in the document shows the name “VEPO Metering” on the meter tag and their address on the work order. Is VEPO currently working in your system? No, this was a sample picture taken from another location.
6. What billing system does North Beach currently use? Are you staying with it post completion? The Town currently used Enhance and we intend to stay with the system.
7. What do you want done with the old, removed meters – Testing and/or scrap? The old meters will remain at the Public Works Department.
