Mark R. Frazer, Mayor

Welcome

The Town of North Beach became a Sustainable Community in 2017 by achieving many milestones in Sustainability.

We wanted to invite our residents to take part in assisting the Town's efforts by reducing their carbon footprint also. Our program reaches beyond our boundaries but crosses jurisdictions to ensure that anyone from Calvert County can apply to make their home energy-efficient.

By making improvements to your home in a sustainable and energy-efficient way, we can all look forward to Calvert County reducing their carbon footprint one home at a time.

We are extremely proud that we have received funding from the Maryland Energy Administration through which this opportunity is possible. This opportunity will assist many households in requesting additional funding for many years to come.

Let's all participate in having our County and our town one of the most sustainable in the State of Maryland. Join the movement of healthy living with this program.

Sincerely,

Mark R. Frazer
Mayor

Healthy Living Program

What is the Healthy Living Program?

The Town of North Beach became a Sustainable Community in 2014 with the State of Maryland and a Sustainable Maryland certified with the State of Maryland. Both of these programs foster the abilities of towns towards establishing green practices, saving money and taking positive steps in sustaining the quality of life for residents over the long term.

We wanted to further those goals with a workplan with the support of our Environmental Committee and Town Council to launch a Healthy Living Program. This program, made possible through funding from the Maryland Energy Administration, has been created to assist those most vulnerable, seniors and low-to-moderate income residents, to take part in reducing their carbon footprint. Utility bills are rising and this is a program that will lower your utility bills and allow for more money in your pocket and less money towards paying your utility bills. Our programs reaches beyond our boundaries so that residents of Calvert County may apply to make their homes more energy efficient.

This funding is limited and if you need any information we will be glad to assist you in filling out your application. Feel free to reach out to us if you need additional information. We can be reached at 301.855.6681 or send an email to info@northbeachmd.org.

Healthy Living Program

FREQUENTLY ASKED QUESTIONS (FAQ)

Why is it necessary to have an energy audit for my home? An energy audit is the blueprint for your home for energy efficiency. It spells out your entire home and the steps necessary to make it more energy efficient. This will assess the energy consumption for your home. We feel it is important to see the improvements after your energy improvements are made to your home.

Why is it necessary to supply one recent utility bill? With a copy of your BGE bill we are able to measure your usage before and after all of the energy measures are applied and any new appliances are installed. This is good also for you to see the savings after these performance measures are applied.

What happens when the funding is depleted? We will take applications to begin a waiting list for the next funding award. If you meet all of the qualifications, you will be placed on the waiting list.
